SENS T® HXG-2d

Combustible gas leak detector with digital display for accurate measurement of gases.

SENSIT® HXG-2d Combustible gas leak detector is a hand held instrument ideal for detecting and finding the source of natural gas, methane or propane gas leaks.

SENSIT® HXG-2d incorporates an advanced low power semiconductor sensor to measure and display combustible gases in parts per million.

The instrument auto ranges to percent LEL (Lower explosive limit) when concentrations exceed 990 parts per million.

SENSIT® HXG-2d also features our unique audible tick control that helps find the source of gas leaks fast. The tick can be easily heard through the speaker located in the back of the instrument.
